# Lecture Series 2010

## Oceans and Climates

This series is a programme of 6 regionally-based lectures which will run November 2009 to March 2010 at approximately fortnightly intervals, and the umbrella theme for this is Oceans and Climates.

The programme, with lecture locations, speakers and the title of their talk is below and comprises established international speakers. Students will receive priority places, but we will also welcome anyone with an interest in Earth-science, so please contact us for further information if you would like to attend.

The lectures will begin at 5.30pm and last for about an hour. This will be followed by a reception which will enable those attending to meet the speaker and other members of the diverse audience. The lectures are free of charge to attend, but are by ticket only. We will assist students with any related travel costs – please get in touch with us to enquire about this.

Please contact Alys Hilbourne for further details and to let us know that you would like to attend - groups and individuals are welcome. Your University will also be taking names to organise group travel. Please see your course representative: \_\_\_\_\_

DATE	TOPIC	SPEAKER	HOST UNIVERSITY
18 November	Ocean Circulation and Climate	Dr Helen Johnson, University of Oxford	Bristol
2 December	Reconstructing the history of the Antarctic ice sheet: Clues from the past for the future	Dr Tina van de Flierdt, Imperial College London	Birmingham
